

Agenda Item

Stryker Power Load System

Consideration and possible action to approve the purchase of two Stryker Power Load Systems from Stryker Corporation for a total cost not to exceed \$61,974.28.

GEORGETOWN FIRE DEPARTMENT

PRIDE - PASSION - RESPECT

This system is for the two new TRVs that are being requested.

- All medic units are equipped with Stryker equipment. Staff recommends purchasing this system to ensure we maintain a high level of continuity and protection for patients and firefighter paramedics.
- The power load system helps boost safety by supporting the stretcher throughout the loading and unloading process. This reduces the spinal load on our firefighter/paramedics and helps prevent cumulative trauma injuries.

What is a power load system?

- A powered ambulance cot utilizes a battery-powered hydraulic system effectively raising and lowering a cot at the touch of a button.
