

ELECTRIC FUND

The Electric Fund is used to account for the revenues and expenses of the City's electric utility. This includes operating departments, purchased power costs, debt payments, and capital projects. The fund also transfers a Payment in Lieu of Taxes (PILOT) benefit to the General Fund, which represents the value the community receives for utility ownership.

FISCAL YEAR 2022

Total operating revenues are projected to be \$105.5 million, or 2% increase over the FY2022 budget. Electric Sales Revenues are projected to end the year on budget at \$85.6 million. While usage and sales were flat for the first half of the year, the May and June hot and dry weather patterns drove increased usage by customers. Staff will continue monitoring projections for the third and fourth quarter, which so far have also been very hot and dry. Developer contributions are projected to end the year at \$12 million, on pace with the amended budget. New development capital expense has increased significantly in FY2023, and line extensions fees have been adjusted to account for increased costs of materials and labor. Line extension application fees are now shown under permits. Renewable Energy Credit (REC) sales revenues are projected to be \$2.75 million as the City continues to benefit from good pricing in this market.

CC0557 Electrical Engineering	1,070,057	644,339	1,107,635		171.90%
Operating Expense Total	135,440,965	80,338,226	80,153,190	185,036	99.77%

Total operating expenses are projected to be \$80.1 million which is slightly under the budget of \$80.3 million. The largest expense in operations is purchased power, which is projected to be at budget for the year. However, as the hot summer progresses, staff may adjust this projection. Curtailment costs have been higher than previous years and the City is investigating the causes behind the curtailment. Hedging in the winter months mitigates risk, but increases costs. Net purchased power includes curtailment related expenses, congestion revenue rights, and renewable energy credits under non-operating revenue.

The operational cost centers are generally projected to end the year on budget. Transmission and Distribution and Electrical Engineering cost centers budget the full cost of labor in operations, and at fiscal year end, an accounting entry capitalizes the costs of labor attributed to capital improvement projects. Several cost centers were re-organized during FY2022 for operational efficiency and effectiveness. This slightly skews comparisons to the prior year and should normalize in FY2023. Once the utility completes the transition to outsource warehouse operations during the summer of 2022, an estimated \$200,000 expense is included to write off obsolete inventory.

Total non-operating revenue is \$20.2 million for FY2022. This includes \$19.5 million in bond proceeds for capital projects and vehicles, \$200K from miscellaneous project related billings, and \$352K in cost reimbursement (grant revenue) for a TXDOT project. The \$665K budget for Sale of Property represents the third of four installments to transfer the City's Fiber asset from the Electric Fund to the IT Fund. Using one-time savings from FY2021, the IT Department was able to complete both the third and fourth installments of the asset transfer in FY2022. These transactions will show on the balance sheet at the end of the fiscal year.

Non-Operating Expense					
CC0001 Non-Departmental	4,298,971	10,097,271	10,097,271	0	100.00%
CC0557 Electrical Engineering	3,386,145	25,026,230	25,026,230	-	100.00%
Non-Operating Expense Total	7,685,116	35,123,501	35,123,501	0	100.00%

Total non-operating expenses are projected to be \$35.1 million. The \$25 million in capital project expenses include capitalized labor and equipment expenses, as well as all materials. Debt service represents \$10.1 million of the total, a little under half of which is for the debt-financed energy costs of Winter Storm Uri, and the remainder is for infrastructure and vehicles.

Total fund balance is projected to be \$50.2 million as of September 30, 2022. The 90 day operational contingency reserve is projected to be \$6.4 million at year-end while the rate stabilization reserve is projected at \$18.6 million, and the non-operating contingency is projected to be \$8.9 million. \$4.0 million of proceeds from the 2020 sale of the transformers is reserved to pay the existing debt on the assets.

While ending fund balance has significantly increased in the past three years, several current circumstances should be noted. The electric utility is still in the process of completing a thorough cost of service study with a consultant. As load increases with population growth and industrial development, the costs of purchased power will also increase. In turn, the rate stabilization reserve will need to increase. Operating and non-operating reserves will also need to increase. Additionally, Shell Energy and the City are renegotiating the Qualified Scheduling Entity contract. The City will be directly responsible for collateral to participate in the ERCOT market. Cash reserves may be necessary to perform this function. All of these recommendations will be reviewed with the Electric Board and Council once the studies, models and contracts are completed.

FISCAL YEAR 2023

Total operating revenues are budgeted to be \$103.4 million. Electric sales revenue is budgeted to increase due to commercial and residential customer growth. Industrial load growth through approved economic development agreements has been conservatively estimated. Renewable Energy Credits are budgeted at \$1.2 million. Developer Contributions are conservatively estimated at \$6 million. Administrative Charges have increased to \$3.5 million because of a reorganization of shared services between Water and Electric Utilities, and increases to the base and enhanced budgets of the shared services.

The Electric utility and Customer Care staff have worked with the cost of service study consultants to review the non-rate fees for various services. These fees have not been reviewed in recent years and need to be updated for increased costs of labor and materials. The preliminary estimated incremental revenue from the increased fees is \$500,000 annually. (This incremental increase is not shown in the fund yet. Staff are reviewing these fee increases with Council on July 12.)

Total operating expenses are \$87.5 million with proposed service level enhancements. Net purchased power costs, including curtailment, are expected to be \$59.9 million. The amount of labor budgeted to be capitalized in T&D and Electrical Engineering is \$4.7 million. Base budget increases include merit, market, health and retirement personnel costs. The budget includes replacement vehicles, as well as a \$5.5 million transfer to the General Fund for PILOT. This continues to be a capped amount under policy to assist the Electric Fund with increasing fund balance. The City completed an outside review of the cost allocation methods for shared services such as Finance, City Secretary, and Human Resources. The results of the study shift costs away from the

Water and Electric Utilities, and toward the General Fund. Due to economic pressure in the General Fund, this new allocation methodology will be implemented over two fiscal years. Additionally, the costs of shared services have increased for personnel compensation and other inflationary costs, as well as for the one-time upgrade of the utility customer billing software system. The net effect to the Electric Fund is an increase in contributions for shared services. The budget includes a reorganization of metering functions from the Electric utility to Customer Care.

Total non-operating revenues are budgeted at \$9.9 million. The majority of this revenue is from bond proceeds for capital projects and vehicles.

Total non-operating expenses are budgeted to be \$23.1 million, a decrease of 34% relative to FY2022 projections due to the timing of capital projects. These are comprised of \$11.9 million in capital projects related to electric system growth and enhancements. \$11.2 million is for debt payments.

Proposed service level enhancements include programing to meet the business needs for the utility. These include:

- Operational Technology: SCADA Analyst: Current Supervisory Control and Data Acquisition (SCADA) personnel have skills pre-dominantly water and wastewater focused. The electric operations work plan includes distribution automation which requires SCADA personnel with an electric distribution focus. Additionally, a SCADA Analyst is necessary to facilitate the impending SCADA upgrade and needs assessment.
 - Proposed Ongoing: \$142,133

Proposed One-time: \$3,000Proposed Total Cost: \$145,133

• Operational Technology: Data Plans and Network Supplies: With the recent reorganization involving Meter Services and Operational Technology, the costs associated with AMI field network data plans are now being budgeted in the Operational Technology cost center.

Proposed Ongoing: \$12,500
Proposed One-time: \$0
Proposed Total Cost: \$12,500

Operational Technology: Network Supplies: Based on the initial assessment of the
Operational Technology network, immediate network updates are required. This request is
to provide funding necessary to maintain and routinely upgrade the network at a satisfactory
level.

Proposed Ongoing: \$20,500Proposed One-time: \$0Proposed Total Cost: \$20,500

• Operational Technology: Shared Vehicle: As the Operational Technology cost center continues to increase in number of employees, a vehicle is necessary to ensure repairs and maintenance of field equipment occurs in a timely manner.

Proposed Ongoing: \$5,800Proposed One-time: \$40,000Proposed Total Cost: \$45,800

• Operational Technology: Cybersecurity Assessment, Network Enhancements, and Upgrades: The new Operational Technology personnel are developing a plan to enhance the department's cyber security posture and preparedness. The effort will require additional consulting engagements and upgrades. This request is for funding necessary to the department to ensure cyber security is in an optimal position.

Proposed Ongoing: \$22,500Proposed One-time: \$0Proposed Total Cost: \$22,500

• **Electric Administration: Administrative Assistant:** Lack of adequate administrative support has become a pain point for the Electric department. This request is to provide funding for an Administrative Assistant position to join existing personnel in Electric Administration and provide critical public meeting, financial system, and other support to all cost centers in the Electric department.

Proposed Ongoing: \$74,867Proposed One-time: \$3,000

Proposed Total Cost: \$77,867

• *Electric Administration: Employee Recognition:* After going through Gallup employee engagement and action planning sessions with all employees in the Electric department, one consistent area found in need of improvement was employee recognition and communication. This request will provide funding necessary to respond to employee feedback.

Proposed Ongoing: \$36,600
Proposed One-time: \$0
Proposed Total Cost: \$36,600

• **T&D Services: Metering Technician:** Due to the recent re-organization involving meter services, the current meter tech personnel have taken on the responsibility of installing new residential and Commercial and Industrial (C&I) meters, troubleshooting electric meter issues, Distributed Energy Resources (DER) inspections and electric meter audits. This increased workload along with customer growth, particularly in the C&I customer classes and DER installs, warrant the addition of a new FTE resource.

Proposed Ongoing: \$116,864Proposed One-time: \$44,800Proposed Total Cost: \$161,664

• **Electric Systems Operations: Senior Utility Systems Operator:** With the addition of a Utility Systems Operator, the group can now have a total of five shifts each with two Operators. This allows for a training shift and alleviates excess workload of current Operators.

Proposed Ongoing: \$90,349
Proposed One-time: \$3,000
Proposed Total Cost: \$93,349

• **Electric Systems Operations: Utility Systems Locator:** As the City continues to grow, so does the ticket numbers and the area of coverage Electric Systems Operations is responsible for. An additional Locator will provide critical support on system growth and ensure tickets are completed in a timely manner.

Proposed Ongoing: \$82,538Proposed One-time: \$61,500Proposed Total Cost: \$144,038

• **Electrical Engineering: ANB Systems:** In FY 2022 the department implemented a software platform for DER application and permitting. The annual software maintenance cost is \$6,500. The department will also be implementing line extensions application and pole attachment application modules to this platform. The implementation cost is \$5,000 for each of these modules.

Proposed Ongoing: \$18,000

Proposed One-time: \$0Proposed Total Cost: \$18,000

Total fund balance is budgeted to be \$53 million by September 30, 2023. This balance meets the 90-day operating contingency reserve of \$7.5 million. It also reserves \$25.6 million for rate stabilization for purchased power, a \$7 million increase over the prior year. The non-operating reserve is \$9.6 million. The bond proceed reserve to pay the remaining debt on the 2020 sale of transformers is \$4 million.
