#### Notice of Meeting of the Governing Body of the City of Georgetown, Texas December 10, 2019

The Georgetown City Council will meet on December 10, 2019 at 2:00 PM at City Council Chambers, 510 W 9th Street Georgetown, TX 78626

The City of Georgetown is committed to compliance with the Americans with Disabilities Act (ADA). If you require assistance in participating at a public meeting due to a disability, as defined under the ADA, reasonable assistance, adaptations, or accommodations will be provided upon request. Please contact the City Secretary's Office, at least three (3) days prior to the scheduled meeting date, at (512) 930-3652 or City Hall at 808 Martin Luther King Jr. Street, Georgetown, TX 78626 for additional information; TTY users route through Relay Texas at 711.

#### REVISED AGENDA

#### Policy Development/Review Workshop -

- A Presentation and discussion regarding the major changes between the 2012 and 2015 International Building Codes, International Fire Code and the 2017 National Electric Code --Glen Holcomb, Chief Building Official and Jason Fryer, Deputy Fire Marshal
- B Presentation and update regarding the Implementation Plan for the 2030 Plan Update -- Sofia Nelson, Planning Director
- C Presentation and discussion regarding QSE/Energy Management Services Agreement -- Daniel Bethapudi, General Manager of the Electric Utility
- D Presentation and update on the Georgetown Utility Systems (GUS) Advisory Board and possible future structure of the Electric and Water Utility Boards -- Daniel Bethapudi, General Manager of Electric and Glenn Dishong, Water Services Director
- E Presentation and update regarding the Facilities Efficiency Study and presentation of findings -- Eric Johnson, CIP Manager
- F Presentation and discussion regarding the FY2020 Roll Forward Budget Amendment for capital improvement projects -- Paul Diaz, Budget Manager

#### **Executive Session**

In compliance with the Open Meetings Act, Chapter 551, Government Code, Vernon's Texas Codes, Annotated, the items listed below will be discussed in closed session and are subject to action in the regular session.

#### G Sec. 551.071: Consultation with Attorney

Advice from attorney about pending or contemplated litigation and other matters on which the attorney has a duty to advise the City Council, including agenda items

-LHISD Waterline Easement - Nemir

#### Sec. 551.086: Certain Public Power Utilities: Competitive Matters

- Purchase Power Update
- QSE/Energy Management Services Agreement

#### Sec. 551.087: Deliberation Regarding Economic Development Negotiations

- Extension of Aviation Drive -- Michaela Dollar, Economic Development Director
- Rivery Park TIRZ -- Laurie Brewer, Assistant City Manager

#### Sec. 551:074: Personnel Matters

City Manager, City Attorney, City Secretary and Municipal Judge: Consideration of the appointment, employment, evaluation, reassignment, duties, discipline, or dismissal

#### Adjournment

#### **Certificate of Posting**

I, Robyn Densmore, City Secre	etary for the City of Georgeto	own, Texas, do hereby certify that		
this Notice of Meeting was post	ted at City Hall, 808 Martin L	uther King Jr. Street,		
Georgetown, TX 78626, a place	e readily accessible to the gen	eral public as required by law, on		
the day of	, 2019, at	, and remained so posted for		
at least 72 continuous hours preceding the scheduled time of said meeting.				
Robyn Densmore, City Secreta	rv			

#### City of Georgetown, Texas City Council Workshop December 10, 2019

#### SUBJECT:

Presentation and discussion regarding the major changes between the 2012 and 2015 International Building Codes, International Fire Code and the 2017 National Electric Code -- Glen Holcomb, Chief Building Official and Jason Fryer, Deputy Fire Marshal

#### ITEM SUMMARY:

This presentation is an overview of the 2015 IBC and 2017 NEC, and includes:

- Community Comparison of Adopted IBC and NEC
- State Mandate on National Electrical Code
  - This is a state mandated code to ensure all electrical standards are consistent across jurisdictions, regardless of what a municipality has adopted
  - Texas adopted the 2017 NEC, effective Sept. 1, 2017
  - NEC is published every 3 years with the 2017 edition being the most current. First NEC was in 1897
  - All licensed electricians must follow the newest adopted code per licensing law under Section 1305.101, general power and duties
  - Georgetown adopted the 2014 NE local amendments in March 2014
- High-level comparison between the 2012 and 2015 IBC
- High-level comparison between the 2012 and 2015 International Fire Code (IFC)
- Stakeholder Involvement and Public Outreach Plan.

Staff seeks Council feedback and direction on this item.

#### FINANCIAL IMPACT:

IBC and NEC Presentation

Fire Code Presentation

# Overview of 2015 International Building Code (IBC) and 2017 National Electrical Code (NEC)

Presented by Glen Holcomb, Chief Building Official December 10, 2019

#### **Presentation Overview**

- Community Comparison of Adopted IBC and NEC
- State Mandate on National Electrical Code
- High-level comparison between the 2012 and 2015 IBC
- Stakeholder Involvement and Public Outreach Plan
- Feedback and Direction

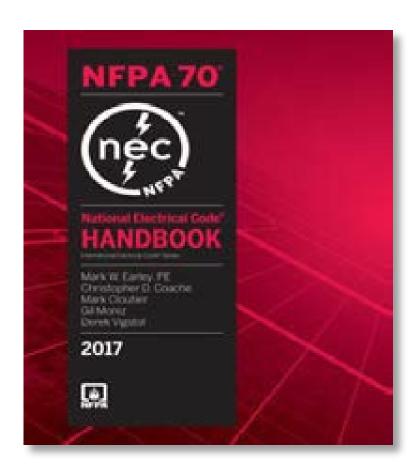

# **Community Comparison of Adopted Codes**

Municipality	I Code	<b>Electrical Code</b>
Austin	2015	Own electrical code
Belton	2015	2014
Cedar Park	2015	NEC 2014
Hutto	2018	2017
Leander	2015	2014
Pflugerville	2015	2014
Round Rock	2015	2017
Taylor	2009	2008
Georgetown	2012	2014

# **NFPA 70 Handbook**

## **State Mandate on National Electrical Code**

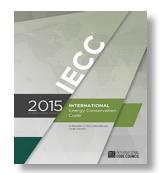

- This is a state mandated code to ensure all electrical standards are consistent across jurisdictions, regardless of what a municipality has adopted
- Texas adopted the 2017 NEC, effective Sept. 1, 2017
- NEC is published every 3 years with the 2017 edition being the most current. First NEC was in 1897
- All licensed electricians must follow the newest adopted code per licensing law under Section 1305.101, general power and duties
- Georgetown adopted the 2014 NEC amendments in March 2014

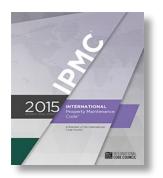

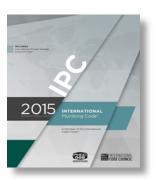

# **2015 International Codes (I Codes)**

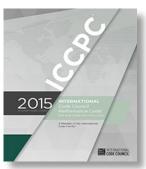

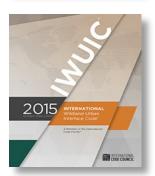

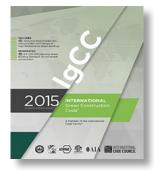

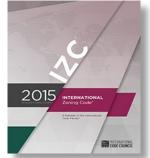

# 2015 International Building Code (IBC)

#### **Chapter 3 Use and Occupancy Classification**

#### **CHANGE SUMMARY:**

#### 304.1 Business Group B

- Business Group B occupancy includes food processing establishments and commercial kitchens <u>not</u> associated with restaurants, cafeterias and similar <u>dining</u> facilities up to 2,500 sq ft
- This code would help take out establishments that meet this summary

  Page 10 of 199

Carry-out business with commercial kitchen

# 2015 International Fuel Gas Code (IFGC)

#### **Chapter 6-623.2 Prohibited Location**

#### **CHANGE SUMMARY:**

 Cooking appliances designed, tested, listed and labeled for use in commercial occupancies shall not be installed within dwelling units

(Unless listed for both)

#### Gas Range for domestic use

- Listed and labeled for domestic use <u>or</u>
- Listed for both domestic and commercial use

# 2015 International Energy Conservation Code (IECC)

#### **C402.1.1 Low Energy Buildings**

#### **CHANGE SUMMARY:**

- Low energy buildings are <u>exempt</u> from the building thermal envelope requirements
- Energy usage less than 3.4Btu/h ft2
- 1.0 watt per sq ft of floor area for space conditioning purposes
- No conditioned space 12 of 199

**Greenhouses** were added to the list of Low Energy Buildings.

NOTE: In June 2015, State of Texas enacted HB 1736 which moved minimum to 2015 IECC.

# 2015 International Energy Code (IEC)

#### **CHANGE SUMMARY:**

State adopted the 2015 IEC in April 2015

- Driving more energy efficient water heaters
  - 2 to 8 inches taller
  - 4 to 6 inches wider
  - Up to 35% cost increase
  - Can save 25% to 50% on utility bills

# 2015 International Plumbing Code (IPC)

#### Chapter 4 – Table 403.1

- The IBC occupancy classifications (A, B, M, etc.) are no longer used to determine how to use
- Table 403.1 Minimum Number of Required Plumbing Fixtures. The actual <u>use</u> of the building <u>or space</u> determines the minimum number of required plumbing fixtures.
- Depending on use, could be less plumbing fixtures required

# 2015 International Plumbing Code (IPC)

#### **Chapter 4 – 403.3 Required Public Toilet Facilities**

- Structures and tenant spaces intended for quick transactions, including takeout, pickup and dropoff, having a public access area less than or equal to 300 square feet
- Cost savings for owner not having to install public restrooms

# 2015 International Plumbing Code (IPC)

#### **Chapter 5 - 504.7.2 Pan Drain Termination**

- Where a pan drain was <u>not</u> previously installed, a pan drain shall <u>not</u> be required for a **replacement** water heater installation
- Existing homes/businesses do not have to run a new drain line, if not previously installed

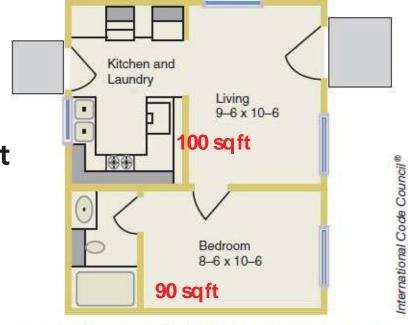

# **Chapter 3 Building Planning and Construction**

#### **CHANGE SUMMARY:**

#### R304.1 Minimum Area

- The requirement for <u>one</u>
   habitable room with a minimum floor area of 120 sq ft has been <u>removed</u> from the code
- Habitable rooms shall have a floor area of not less than 70 sq ft

Small dwelling complying with minimum area requirements

(except kitchen)

#### **Chapter 3 Building Planning and Construction**

#### **CHANGE SUMMARY:**

#### **R305.1 Minimum Height**

 The minimum ceiling height for bathrooms, toilet rooms, and laundry rooms has been reduced to 6 ft – 8 in

# **Chapter 3 Building Planning and Construction**

#### **CHANGE SUMMARY:**

#### R314.2 Where required.

Battery-operated smoke alarms
 are permitted for satisfying the
 smoke alarm power requirements
 when alterations, repairs, and
 additions occur

- Wireless smoke alarms can be used as an alternative to hard wired smoke alarm systems
- Cost savings for retroefitting existing structures

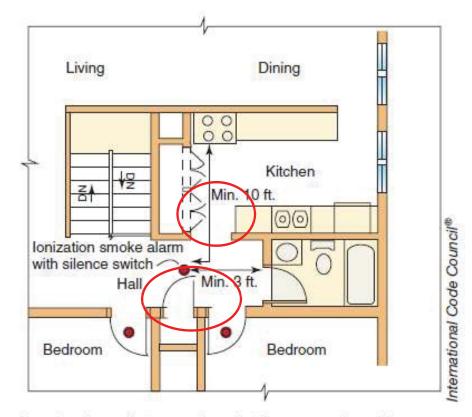

## **Chapter 3 Building Planning and Construction**

#### **CHANGE SUMMARY:**

#### R314.2 Where required.

 New provisions address smoke alarms installed near bathrooms and cooking appliances

Smoke alarm distances from bathrooms and cooking appliances

#### **Chapter 8 Roof - Ceiling Construction**

#### **CHANGE SUMMARY:**

#### **R806.1 Ventilation Required**

- The 2012 I RC <u>exception</u> allowing the <u>building official</u> to waive <u>ventilation requirements</u> due to atmospheric or climatic conditions has been <u>deleted</u>
- It removes the Chief Building
   Official's role in considering
   waiving ventilation in attics and
   other spaces

# 2015 International Existing Building Code (IEBC)

#### **Chapter 3 Use and Occupancy Classification**

#### **CHANGE SUMMARY:**

[A] 101.2 Scope.

- The provisions of the International Existing Building Code shall apply to the repair, alteration, change of occupancy, addition to and relocation of existing buildings
- Regardless of occupancy

# 2015 International Existing Building Code (IEBC)

#### **Chapter 4 Prescriptive Compliance Method**

#### **CHANGE SUMMARY:**

#### 405.1.2 Existing Fire Escapes

- Existing fire escapes shall continue to be accepted as a component in the means of egress in <u>existing</u> buildings only
- New construction must provide fire escape routes through protected, interior routes to meet minimum standards

# 2015 International Mechanical Code (IMC)

#### Chapter 11 – 1102.3 Access Port Protection

- Locking caps are required whenever refrigerant is <u>added</u> or <u>recovered</u> from refrigeration <u>or</u> air conditioning systems
- Unless the ports are located indoors, on roofs with restricted access or behind barriers
- Safety for the public

## Stakeholder Involvement and Public Outreach Plan

- Public meetings with builders, developers, and other development professionals
- Notice to building permit applicants of contemplation of update to IBC and NEC
- Presentation(s) to Chamber Development Alliance
- Opportunity to provide comments on City's website
- Open house and office hours

## **Council Feedback and Direction**

- Does Council support proceeding to collect public input on the proposed update to the IBC and NEC?
  - This would allow staff to return to Council in Q1 2020 to share community feedback, provide staff recommendation on local amendments, and seek Council's direction on whether or not to develop ordinance to amend the IBC and NEC.
- Are there any other methods of outreach to include in the stakeholder involvement and public outreach plan?

# International Fire Code Major Changes from 2012 to 2015

# Overview

- Consider adoption of the 2015 International Fire Code
- Review/discuss major changes between 2012 IFC and 2015 IFC

- Improve regional consistency of code adoption/application with following the jurisdictions:
  - Taylor (2009)
  - Georgetown (2012)
  - Cedar Park, Round Rock, Leander, Williamson County, Liberty Hill (2015)
  - Hutto (2018)

# Section 403 Emergency Preparedness Requirements

#### **New Requirement**

- Section 403 Specifically discusses requirements for various occupancies types such as:
  - Fire evacuations plans Fire safety plans- Staff training
  - Emergency evacuation drills and frequency
  - Crowd managers on event over 1,000 personal, one (1) to every 250 people.

\*Exception- the fire code official is allowed to reduce the number of crowd managers for events that are held in doors in a sprinkled building.

# Section 1004 Occupant Load

# **Updated Revision**

• This helps in determining the number of exits, sizing of exits and the width of exit access.

- Technical Language
  - 1004.1.1.1 Intervening spaces or accessory areas. Where occupants egress from one (1) or more rooms, areas or spaces through others. The design occupant load shall be the combined occupant load of interconnected accessory or intervening spaces. Design of egress path capacity shall be based on the cumulative portion of occupant loads of all rooms, areas or spaces to that point along the path of egress travel.

# Section 1017 Exit Access Travel Distance

# **Updated Revision**

- Expanded travel distance to exit point in Factory and Storage occupancies has ben increased from 250' to 400'.
- Technical Language
  - 1017.2.2 Group F-1 and S-1 increase. The maximum <u>exit access</u> travel distance shall be 400 feet (122 m) in Group F-1 or S-1 occupancies where all of the following conditions are met:
    - 1. The portion of the building classified as Group F-1 or S-1 is limited to one (1) story in height.
    - 2. The minimum height from the finished floor to the bottom of the ceiling or roof slab or deck is 24 feet (7315 mm).
    - 3. The building is equipped throughout with an automatic sprinkler system in accordance with Section 903.3.1.1.

# Section 1105 Construction Requirements For Existing Group I-2

\*\* Retroactive Requirements \*\*

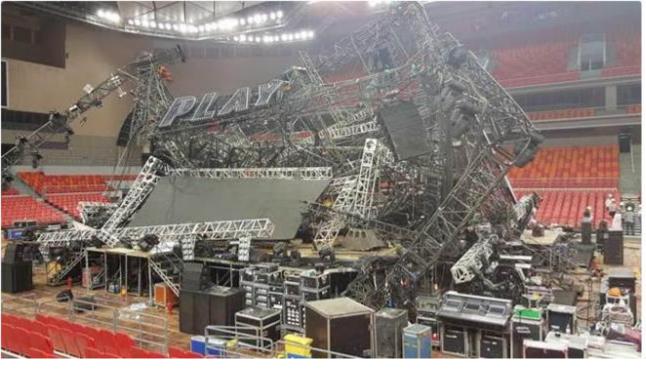

This new section adds retroactive construction requirements for existing Group-2 occupancies. <u>These requirements align the IFC with the current approach by the center for MEDICAID and MEDICARE SERVICES (CMS), the federal authority having jurisdiction.</u>

Existing Group I-2 shall meet all of the following requirements:

- 1. The minimum fire safety requirements in Section 1103.
- 2. The minimum mean of egress requirements in Section 1104.
- 3. The additional egress and construction requirements in Section 1105.

# Section 3105 Temporary Stage Canopies

# Section 3105 Temporary Stage Canopies

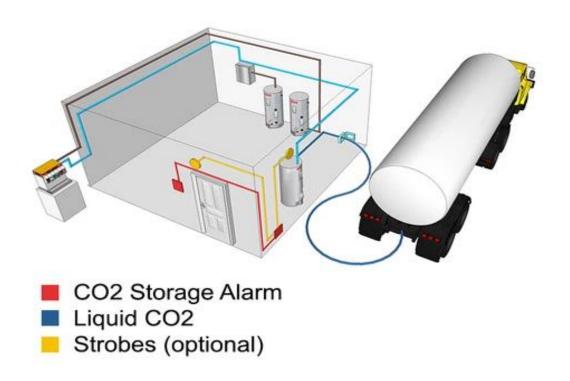

# **New Requirement**

- Permit required for temporary stage canopies in excess of 400 square feet (37 m2)
- Shall comply with Section 3104, Sections 3105.2 through 3105.8 and ANSI E1.21
- Use period not to exceed 45 days

- A qualified, independent approved agency or individual to inspect the installation of temporary stage canopy
- Reviewed by Building and Fire Code Official

# Section 5307 Carbon Dioxide (CO2) Systems Used In Beverage Dispensing Applications

Typical Restaurant Installation

# Section 5307 Carbon Dioxide (CO2) Systems Used In Beverage Dispensing Applications

## **New Requirement**

- Carbon dioxide systems with more than 100 pounds (45.4 kg) of carbon dioxide used in beverage dispensing applications shall comply with Sections 5307.2 through 5307.5.2.
- Must provide:
  - 1. Vehicle impact protection if located in area of vehicle traffic.
  - 2. Mechanical ventilation
  - 3. Emergency alarm system
  - 4. Hazard Warning signs placed at entrances to buildings and / or storage rooms

## **Questions & Comments**

#### City of Georgetown, Texas City Council Workshop December 10, 2019

#### SUBJECT:

Presentation and update regarding the Implementation Plan for the 2030 Plan Update -- Sofia Nelson, Planning Director

#### ITEM SUMMARY:

**Background**: While the City of Georgetown 2030 Comprehensive Plan is fundamentally a "policy document," the goals, policies, and actions identified in it will only become a reality by concerted, consistent attention to implementation. This requires that the City administration, departments, and present and future Planning and Zoning Commissions and City Councils actively and continuously use the 2030 Comprehensive Plan as a key reference for all decisions and actions, consistent with the strategic initiatives and policies contained in the Plan.

**Presentation Purpose**: Present an implementation strategy for implementing the City's 2030 Plan. This will be the first of two workshops on the implementation of the 2030 plan. Prior to establishing specific action steps staff would like to confirm the proposed strategy for structuring the implementation section of the 2030 plan.

#### Feedback Requested:

- Do you support the implementation strategies outlined in this presentation?
- Is there additional information needed in advance of the preparation of specific implementation action steps?

#### FINANCIAL IMPACT:

n/a

Comprehensive Plan Implementation Workshop Presentation Top 3 Implementation Strategies Housing Toolkit Matrix

City Council Workshop December 10, 2019

## Purpose of Presentation

Present an implementation strategy for implementing the City's 2030 goal and policies.

### Goals

Council Confirmed 2/26/2019

## **Policies**

Council Confirmed Spring/Summer 2019

## **Implementation Strategy**

**Current Work** 

## **Action Plan**

Following direction on strategy staff will prepare action plan with a specific details

## Feedback Requested

- Do you support the implementation strategies outlined in this presentation?
- Do you concur or seek amendments to the identified solutions and key takeaways?
- ❖Is there additional information needed in advance of the preparation of a specific implementation action plan that implements the proposed strategies, identified solutions, and key takeaways?

## Workshop Presentation Outline

- I. Implementation Plan Introduction
- II. Steps taken to reach this point
- III. Implementation Strategies
- IV. Feedback from City Council

# Part I. Implementation Plan Introduction

## Part I. Implementation Plan Introduction

# What makes a comprehensive plan "implementable"?

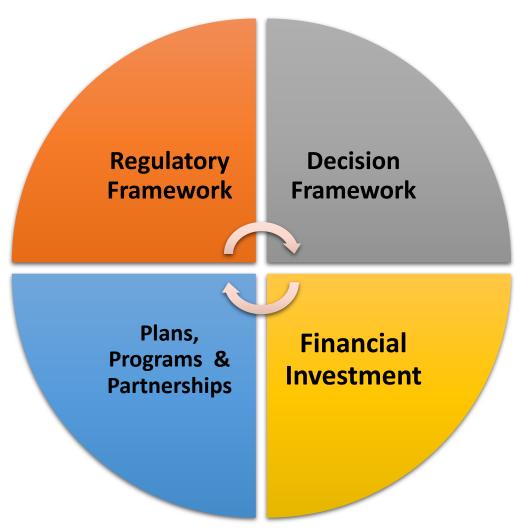

- ☐ A vision for how the community wants to grow.
- □Plan for where uses should develop and a complimentary transportation plan.
- ☐ An action plan that is intentional, incremental, and is based on a series of action steps programed to build on each other within specific timeframes.

## Part I. Implementation Plan Introduction

The development of a community is largely done through individual property owners and private investment. UDC consistency with the 2030 plan is essential to gain the full benefit of the plan update.

The comprehensive plan provides high level guidance. At times a deeper more strategic plan is needed.

Tying the policies to action steps used in the decision-making process is key to ensuring the vision, regulatory framework and decision making steps all connect and work toward implementing the community vision.

The prioritization and implementation of policies, regulatory framework, and capital improvements will need to be prioritized in both the initial implementation as well as annually in the budgeting process.

Page 45 of 199

# Part II. Steps taken to reach this point

## "A caring community honoring our past and innovating for the future."

#### **GOALS GUIDING LAND USE POLICY**

Balanced land use

Housing and neighborhoods

Reinvestment

High quality infrastructure

Development framework

Land use that enables partnerships

Historic preservation

Integrate greenspace & recreation

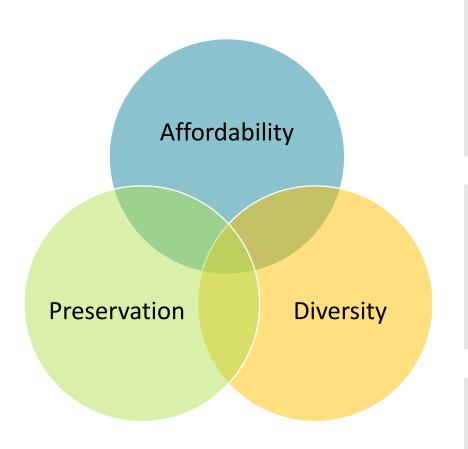

Effective communication

Maintain levels of service as we grow

# HOUSING POLICY

# Confirmed with City Council 2/2019 and 7/2019

1. Specificity.

Policies/actions need to address the rental housing needs of low income and seniors and the homeownership opportunities for the workforce community

2.

#### Investment.

We need to be clear in our investment level through clear definitions of partner, lead and support.

3.

#### Actionable.

We need have a detailed goal to measure success and adjust where necessary.

## **Housing Toolkit**

- ☐ The Housing Toolkit is <u>NOT</u> a housing implementation plan.
- ☐ It IS a standalone resource that, is based on the policy direction provided by City Council, provides a summary of the fundamental tools and programs that support affordable housing.

# Future Land Use Map Principals

- Desire for vibrant, mixed use areas
- Desire for mixed low- and moderate-density neighborhoods, but still a need a designation for only single-family neighborhoods
- Desire to integrate limited higher-density housing with mixed use and commercial developments
- Support findings from previous studies (Target Industry Analysis, Market Assessment, etc.)
- Ensure intentional infrastructure planning to promote sustainability and fiscal responsibility

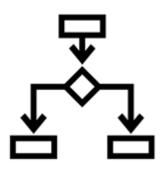

Part III. Implementation Strategies

## 3 MAJOR STRATEGIES

## **Regulatory Framework:**

regulations and standards ("rules") for the development of land primarily zoning and subdivision

#### **Decision Framework**

criteria and processes used in the decision-making process related to land development by City Council ("why")

## Plans, Programs, Partnerships

Plans require additional work to further 2030

Programs are routine activities of the City

Partnerships: allow us to maximize resources and concentrate efforts

# Steering Committee Feedback

"Can draw direct connections to goal and policy work"

"Provides a measuring stick for success"

"Hit the nail on the head on all implementation priorities"

Strategy Benefits

" Partnership with GISD is written down" "Good balance of achieving goals.... Not telling people no and not giving away everything" /

"Succinct"

Page 53 of 199

## CONCERNS

#### Using the Plan

- What process will this be applied to, when someone wants to build something?
- Common interpretation?
- Residential vs. nonresidential % for future land use districts can possibly be too hard to balance and enforce
- Do we have enough criteria to make discretional decisions? Is there enough detail for staff analysis?

- Keeping the plan off the shelf and alive
  - Bandwidth of City staff to keep plan alive with current staffing levels.
  - Is this a plan that will be on the shelf?
  - Hate to do the work and it go unused
  - Commitment to annual meeting

## CONCERNS

#### Incentives

- Incentives for single family residential historic properties need to be listed.
- Who is developing the standards/incentives
- Development incentives clarify, political

#### Home Repair

- Minimal dedicated funds to Home Repair program limit its effectiveness.
- Use of a Multi-family rehab strategy could lead to landlords abusing money for improvements and lead to raising rents.

#### • MISC.

- Balancing the vision of the plan with property owner rights and the City making decisions.
- There appears to be a lot of plans in the implementation strategies and not many partnerships or programs.
- County should be a identified partner.

## SOLUTIONS

#### Using the Plan

 Pay attention to detailed implementation, keep the big picture in mind

#### **Home Repair**

- Rent control, other tools to not take advantage of renters
- Education, ensuring that people know about homestead exemptions to stay in homes

#### Keeping the Plan Alive

- Annual reviews and reports to evaluate progress – "so that's what you did with that idea"
- Invest in resources to get the work done
- Checklist when developers come in preapplication, possible scoring
- Creating checklist is a way of keeping plan alive (keeps it in the forefront)
- Quarterly evaluations of 2030 Plan

## SOLUTIONS

#### **Incentives**

- Dedicated funding resource for incentives to encourage housing goals.
- Define what an incentive is.
- Utilize cheapest incentives, such as funding others are providing ( example grants, LIHTC.)
- Specifically initiate (tax abatement for historic downtown, residential incentives)

#### Misc.

- Start working with County early
- Stay connected to national innovation

## **TAKEAWAYS**

- Key areas should be identified for targeted development and the use intentional infrastructure.
- Dedicated funding source for implementation of housing goals should be identified.
- Keep the plan alive through identified solutions and additional staff resources to prioritize the implementation of the plan.
- Incentives should be defined to include financial and development standard incentives (ex. density bonuses, height increase, impervious bonuses, etc.)

## **PRIORITIES**

- Update development standards
- Review utility connection policies
- Adopt a Historic Preservation Element
- UDC diagnostic review
- Employment Center capital improvements
- Incentives for moderate density and moderate priced housing types

#### 2030 PLAN IMPLEMENTATION SUMMARY

	ZUJU PLAN UPDATE
Strategic Initiatives	Implementation Approach and Tools
Regulatory Framework	Diversity and Density  Update development standards to ensure compatibility of diverse uses including buffers, setbacks to reduce barriers to higher density
Goals: 1. Balanced land use	development in Community Commercial Centers and support the updated residential future land use categories  Use tailored development standards for key areas: Employment Centers, Regional Centers, Gateways, Southeast Georgetown, Williams Drive
2. Reinvestment	and Downtown  Preserve the City's historic resources and reuse existing structures through tailored, flexible development standards
3. Development framework	Allow a variety of housing types, lot sizes, and a balance of amenities
4. Historic Preservation	Develop incentives for inclusion of moderate density, moderately priced housing types, affordable/workforce housing creation
6. Housing & neighborhood	Land Uses
8. Land use that enables	Gateways
partnerships	Update boundaries of overlay districts to reflect development changes within an area (for example, once identified scenic areas have now become urbanized areas)
	Identify specific locations for major gateway sign locations (I-35 northbound, SH-130) and minor gateway signs (S. Austin and SH29 entrances into historic Georgetown)
	Create an Urban Corridor type
	Update Scenic Corridor standards for larger setbacks, lower building heights, native landscaping and limited lighting
	Update Downtown Corridor standards for building and street front design  Prioritize building and site design (placement of buildings, materials, landscaping) when negotiating development agreements and potential
	incentives for I-35, SH130, SH29, SH195 that support Employment Centers and Regional Centers
	Williams Drive Subarea  • Establish a Williams Drive special zoning district area that implements proposed mix of uses, density, and building form (setbacks, height, and
	design)
Decision Framework	Develop an incentive program for enhancing site and buildings in compliance with the goals and policies of the Williams Drive Subarea  Development Agreements, Annexation, Special Purpose Districts and Intentional Infrastructure
	<ul> <li>Review utility connection policies to ensure support of land use goals (#1, 2, 3, 6, 7, 8) of the Comprehensive Plan</li> </ul>
Goals: L. Balanced land use	Incentivize and/or ready infrastructure for development in key, prioritized Employment Centers, Southeast Georgetown and mixed-use
Balanced land use	developments  Update approval criteria for voluntary annexation
. Development framework	Review approval criteria for special purpose districts (MUD, PID, TIRZ, PUD) to distinguish between types of development and identify specific
i. Housing & neighborhoods	criteria for meeting diversity and density goals  Evaluate annexation requests and special purpose districts using the City's Fiscal Impact Model
	<ul> <li>Evaluate annexation requests and special purpose districts using the city's riscal impact widder</li> <li>Develop a Comprehensive Plan checklist for use in evaluating development proposals and zoning applications for consistency with the plan's</li> </ul>
	principles and direction
	Financial assistance/incentives to housing developers and builders meeting housing policies
	<ul> <li>Development and other incentive agreements – tailored development standards and/or contribution in infrastructure costs (including audit of existing workforce housing standard incentive to ensure its usability)</li> </ul>
	Utilize special purpose financing districts (MUDs, PIDs, TIRZs) policy (for example, to incorporate a minimum amount of workforce housing as
	part of the consent to utilize a special purpose financing district)
	<ul> <li>Consider utilizing fee waivers (for example parkland, development application, and building permit fees)</li> <li>Create a dedicated funding source for housing development incentives and agreements</li> </ul>
Plans, Programs, and	Small Area Planning & Neighborhoods
Partnerships	Use small area planning in key locations to promote development/redevelopment
Goals:	Explore the applicability of Neighborhood Empowerment Zones, Neighborhood Conservation Districts or Overlays     Develop Neighborhood Association Program (assist neighborhoods with education/tools for establishment)
. High quality infrastructure	Comprehensive Plan Elements
Land use that enables	Adopt a Historic Preservation Element as part of the next update to the Downtown Master Plan
partnerships	Update the Parks Plan Update the Overall Transportation Plan (OTP)
). Integrate greenspace &	Revisit charter required 2030 plan elements for applicability and identify specific timeframes for update when necessary (Citizen's Participation).
ecreation	Plan, Urban Design Element, Public Safety Element)
0. Maintain levels of service	Update Utility Master Plan
is we grow	Capital Improvement Planning (CIP)
	Identify key capital improvements needed in Employment Centers to support economic development objectives
	Use 4A/4B funds to support Employment Centers, Regional Centers     Dedicate 5% of project costs of all new roadway improvements within Gateway corridors for beautification
	Annual Reporting (2030 Plan)
	Convene the 2030 Steering Committee annually to review and approve the annual report
	Partnerships  • Partner with GISD for planning of future school sites and infrastructure
	Adopt a Health and Human Services Element
	Support Georgetown Housing Authority (GHA) preservation of units
	Support housing non-profits, banks with Community Revitalization Act initiatives, and other community organizations  Home Repair
ALCOHOL: NAME OF THE PARTY OF T	Expand home repair programs to reach moderate income workforce owner-occupied households and small-scale rental properties
	Create a dedicated funding source eligible to be used for both workforce and lower income housing rehab

## Part IV. Feedback

## Feedback Requested

- Do you support the implementation strategies outlined in this presentation?
- Do you concur or seek amendments to the identified solutions and key takeaways?
- ❖Is there additional information needed in advance of the preparation of a specific implementation action plan that implements the proposed strategies, identified solutions, and key takeaways?

#### 2030 PLAN IMPLEMENTATION STRATEGIES SUMMARY

Strategic Initiatives	Implementation Approach and Tools
Regulatory Framework  Goals: 1. Balanced land use 2. Reinvestment 3. Development framework 4. Historic Preservation 6. Housing & neighborhoods 8. Land use that enables partnerships	Diversity and Density  Update development standards to ensure compatibility of diverse uses including buffers, setbacks to reduce barriers to higher density development in Community Commercial Centers and support the updated residential future land use categories  Use tailored development standards for key areas: Employment Centers, Regional Centers, Gateways, Southeast Georgetown, Williams Drive and Downtown  Preserve and incentivize the City's historic resources and reuse existing structures through tailored, flexible development standards  Allow a variety of housing types, lot sizes, and a balance of amenities  Develop incentives for inclusion of moderate density, moderately priced housing types, affordable/workforce housing creation  Land Uses  Perform UDC diagnostic review of allowed uses, density and subdivision requirements to implement Comp Plan  Review and update rezoning approval criteria  Gateways  Update boundaries of overlay districts to reflect development changes within an area (for example, once identified scenic areas have now become urbanized areas)  Identify specific locations for major gateway sign locations (I-35 northbound, SH-130) and minor gateway signs (S. Austin and SH29 entrances into historic Georgetown)  Create an Urban Corridor type  Update Scenic Corridor standards for larger setbacks, lower building heights, native landscaping and limited lighting  Update Downtown Corridor standards for buildings and street front design  Prioritize building and site design (placement of buildings, materials, landscaping) when negotiating development agreements and potential incentives for I-35, SH130, SH29, SH195 that support Employment Centers and Regional Centers  Williams Drive Subarea  Establish a Williams Drive special zoning district area that implements proposed mix of uses, density, and building form (setbacks, height, and design)  Develop an incentive program for enhancing site and buildings in compliance with the goals and policies of the Williams Drive Subarea
Decision Framework  Goals: 1. Balanced land use 3. Development framework 6. Housing & neighborhoods	<ul> <li>Development Agreements, Annexation, Special Purpose Districts and Intentional Infrastructure</li> <li>Review utility connection policies to ensure support of land use goals (#1, 2, 3, 6, 7, 8) of the Comprehensive Plan</li> <li>Ready infrastructure for development in key, prioritized Employment Centers, Southeast Georgetown and mixed-use developments</li> <li>Update approval criteria for voluntary annexation</li> <li>Review approval criteria for special purpose districts (MUD, PID, TIRZ, PUD) to distinguish between types of development and identify specific criteria for meeting diversity and density goals</li> <li>Evaluate annexation requests and special purpose districts using the City's Fiscal Impact Model</li> <li>Develop a Comprehensive Plan checklist for use in evaluating development proposals and zoning applications for consistency with the plan's principles and direction</li> </ul>

Strategic Initiatives	Implementation Approach and Tools
	<ul> <li>Financial assistance/incentives to housing developers and builders meeting housing policies</li> <li>Development and other incentive agreements – tailored development standards and/or contribution in infrastructure costs (including audit of existing workforce housing standard incentive to ensure its usability)</li> <li>Utilize special purpose financing districts (MUDs, PIDs, TIRZs) policy (for example, to incorporate a minimum amount of workforce housing as part of the consent to utilize a special purpose financing district)</li> <li>Consider utilizing fee waivers (for example parkland, development application, and building permit fees)</li> <li>Create a dedicated funding source for housing development incentives and agreements</li> </ul>
Plans, Programs, and Partnerships  Goals:	<ul> <li>Small Area Planning &amp; Neighborhoods</li> <li>Create small area plans to guide development in key locations</li> <li>Explore the applicability of Neighborhood Empowerment Zones, Neighborhood Conservation Districts or Overlays</li> <li>Develop Neighborhood Association Program (assist neighborhoods with education/tools for establishment)</li> </ul>
7. High quality infrastructure	Comprehensive Plan Elements     Adopt a Historic Preservation Element as part of the next update to the Downtown Master Plan
8. Land use that enables partnerships	<ul> <li>Update the Parks Plan and the Overall Transportation Plan (OTP)</li> <li>Revisit charter required 2030 plan elements for applicability and identify specific timeframes for update when necessary (Citizen's Participation Plan, Urban Design Element, Public Safety Element)</li> <li>Coordinate Utility Master Plan with 2030 Comprehensive Plan</li> </ul>
<ul><li>9. Integrate greenspace &amp; recreation</li><li>10. Maintain levels of service</li></ul>	<ul> <li>Capital Improvement Planning (CIP)</li> <li>Identify key capital improvements needed in Employment Centers to support economic development objectives</li> <li>Use 4A/4B funds to support Employment Centers, Regional Centers</li> <li>Dedicate 5% of project costs of all new roadway improvements within Gateway corridors for beautification</li> </ul>
as we grow	<ul> <li>Annual Reporting (2030 Plan)</li> <li>Convene the 2030 Steering Committee annually to review and approve the annual report</li> <li>Prepare an annual community report card on comprehensive plan progress</li> <li>Develop a comprehensive plan checklist for use in evaluating development proposals and zoning applications for consistency with the plan's principles and direction</li> </ul>
	Partnerships  Partner with GISD for planning of future school sites and infrastructure  Adopt a Health and Human Services Element  Support Georgetown Housing Authority (GHA) preservation of units  Support housing non-profits, banks with Community Revitalization Act initiatives, and other community organizations
	<ul> <li>Home Repair</li> <li>Expand home repair programs to reach moderate income workforce owner-occupied households and small-scale rental properties</li> <li>Create a dedicated funding source eligible to be used for both workforce and lower income housing rehabilitation</li> </ul>

QSE/Energy Management Presentation

## **Energy Management and Qualified Scheduling Entity Services Agreement**

## Daniel Bethapudi General Manager - Electric

## Electric Energy Portfolio Managed Services

- Electric Energy Portfolio Managed Services RFP No. 201919 Issued on 02/08/2019
- Total Number of Responses: 12
- Multi-step RFP response evaluation narrowed down the list to:
  - Tenaska Power Services Co
  - Shell Energy North America

# Overview of Services provided by Shell Energy North America

- QSE Services
  - Shell Energy will develop and recommend bids and offers to the City of Georgetown.
  - Shell Energy will submit all Day Ahead schedules (bids and offers),
     Adjustment Period schedules (bids and offers), bilateral trades and current operating plans on Customer's behalf to ERCOT.
  - Shell Energy shall provide daily P&L and position reports and weekly transaction reports to Customer
  - Provide settlement and billing administration for ERCOT statements
  - Shell Energy shall maintain Level 4 QSE Qualification with ERCOT to represent each Customer Resource.

# Overview of Services provided by Shell Energy North America

- Load Forecasting Services
  - Shell Energy to provide load forecasting services for the City of Georgetown using Customer-specific data.
  - Shell Energy will provide an hourly weather-adjusted load forecast of the Customer LSE's Energy requirements.
- Purchase Power Cost Optimization Services
  - Shell working in close collaboration with the City of Georgetown, will analyze the costs and recommend activities and transactions to the customer with the sole objective of achieving lower purchased power cost.
- Congestion Management Services.
  - In order to lower purchased power costs, Shell Energy working in close collaboration with the City of Georgetown shall develop and implement congestion management strategies related to Customer's electric energy portfolio including customer's Resources and load

## Recommendation

 Based on the energy portfolio needs of the City of Georgetown and the overall capabilities and costs, staff recommends contracting with Shell Energy North America to provide Energy Management and Qualified Scheduling Entity Services.

Presentation and update on the Georgetown Utility Systems (GUS) Advisory Board and possible future structure of the Electric and Water Utility Boards -- Daniel Bethapudi, General Manager of Electric and Glenn Dishong, Water Services Director

ITEM SUMMARY:

FINANCIAL IMPACT:

N/A

SUBMITTED BY:

Daniel Bethapudi - General Manager, Electric Utility

ATTACHMENTS:

**GUS** Board Presentation

## GUS Advisory Board - Update

Presented by

Glenn Dishong

Director – Water/Wastewater

Daniel N Bethapudi

General Manager - Electric

## **GUS** Board History

- Established in 2002 along with GTAB to provide advice to City Council on major CIP expenses/fees/rates
- Initially, (2) Council Members and (5) industry specific membership
- Bylaws changed three times since 2002 but industry specified membership and Board size has remained unchanged
- Council membership changed in 2015 to no less than (1) no more than (2) members
- Typical business has been project specific CIP expense (over \$50,000.00), impact fees and rates every three years

## **GUS** Board Bylaws

#### **Purpose**

The Board is established to review and analyze the policies and resources of the Georgetown Utility Systems concerning the business aspects of such policies and resources as they relate to the City funded capital improvement projects, utility services, resource supplies, water, wastewater, stormwater, electric rates, impact fees and other Council-assigned projects, and to report recommendations to the City Council

## GUS Board Updates in 2019

#### 2/26/2019 City Council Meeting Directive:

- Council wanted to review roles, mission and composition of members
- Council moved to delay decision on GUS Board membership until there was time to review the purpose and mission and determine the appropriate function of the board.

#### May 2019, Management Assessment Recommendation:

- "Study the installation of separate governance structure for Georgetown Utility Systems. While any changes to GUS governance structure will not impact past decisions, this issue is worth considering for future management of GUS power and other electric utility management."
- "Separate governance structure would shift from Advisory to more Direct Oversight and business unit specific financial responsibility"

## GUS Board Discussion on 7/9/2019

- Key take-aways from the council workshop presentation on 7/9/2019:
  - Council support for separating the electric and water/wastewater oversight/advisory functions.
  - The need for financial oversight for both utilities
  - The need for risk oversight for electric.
  - The need for board members who can provide adequate oversight to address purchased power and overall electric utility financial performance.
  - The need for independent 3rd party analysis and advice on complex issues.
  - Further evaluate the concept of Electric and Water/Wastewater boards.

## Two Separate Boards?

- Electric and Water/Wastewater departments are dealing with similar challenges related to growth they also have unique challenges that require heightened oversight.
- Electric and Water/Wastewater departments operate in different market conditions, therefore, are exposed to different risks, opportunities, and challenges.

#### Pros:

- Help address unique challenges of growth, service area, and risk associated with the different utilities. Singularly focused on the challenges unique to the electric and water/wastewater utility.
- Provide better alignment and focus for staff. Provides clear necessary support and appropriate oversight to the GM/Department Director.
- Advise the City Council on the overall financial performance and short term and long term challenges and opportunities.

#### Cons:

Some synergies with other City Departments could be lost.

## Board's role in Public Utilities

- Public utilities (Electric and Water/Wastewater) are enterprise activities of the local government and is not a typical municipal operation.
- A public utility (Electric and Water/Wastewater) is a municipallyowned business generating its own revenues that fund operating expenses, debt service, operating and capital reserves, PILOT and depreciation just like a private business enterprise.
- An effective oversight body can ensure the short term and long term viability of the public utility.

## Staff's Recommendation

In order to provide appropriate oversight to the electric and water/wastewater utilities and advise to the City Council, staff recommends creating two separate oversight boards for electric and water/wastewater.

<u>Purpose</u>: Clearly define the purpose of the oversight boards to address the issue of oversight.

Member Eligibility: Structure the respective boards with members who have the expertise required to provide appropriate oversight.

 Align the board membership eligibility requirements with the oversight expectations and responsibilities.

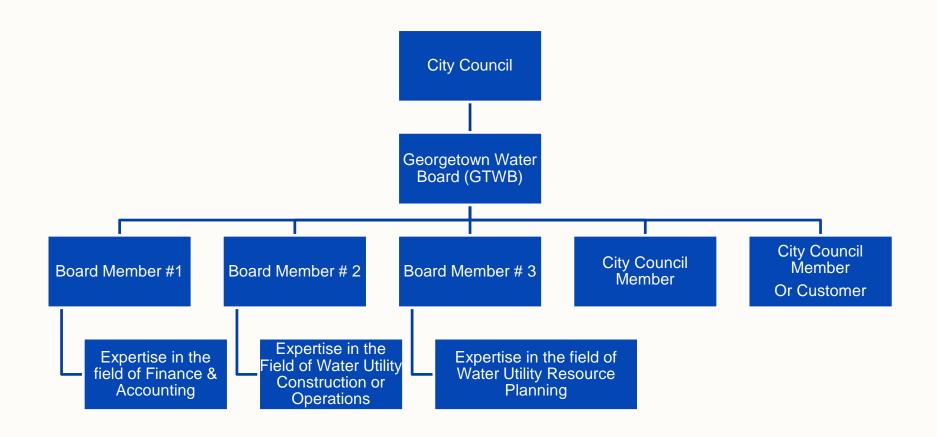

## Water Utility Board

- Expand purpose to include financial oversight of Water Utility
- Provide for membership with specific Water Utility experience
  - Water Utility Construction or Operations
  - Finance and Accounting
  - Water Utility Resource Planning
- Consider reduction in board membership from 7 to 5
- Maintain at least one member from outside the city limits
- Continue to use Board as the core membership of the Impact Fee Committee (less Council Member)

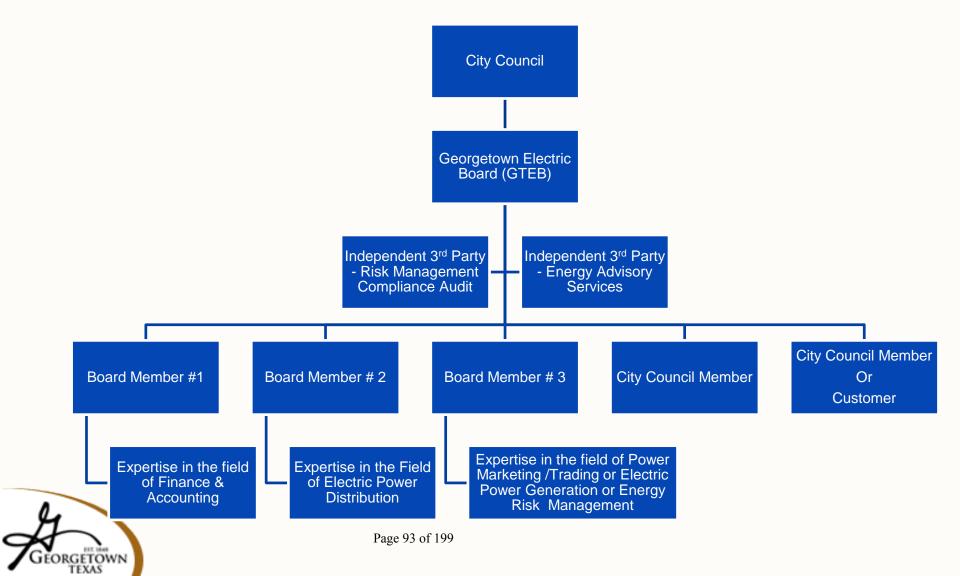

## Georgetown Water Board (GTWB)

## Georgetown Electric Board (GTEB)

## GTEB's proposed role in Risk Management

- Georgetown Electric Board (GTEB)
  - Aid the City Council in providing the overall Policy Oversight.
  - An independent third party appointed by the Georgetown Electric Board will provide periodic Risk Management Policy Compliance reports to the GTEB and City Council.
  - Receives Monthly Risk Management Policy updates from Risk Oversight Committee (ROC) and Risk Management Committee (RMC)

## Next Steps

- Receive Feedback and Direction
- Work on the Ordinance to implement two separate oversight boards for Electric and Water/Wastewater.
- Develop Board Purpose and Membership eligibility.
- Projected Implementation : Spring 2020.

Facilities Efficiency Study

# FACILITIES EFFICIENCY STUDY 2019

City Council Presentation

December 10, 2019

### GOAL

- Review initial findings
- Review the long term plan
- Provide insight

#### PURPOSE

- City has grown by 56% since 2010
- Anticipate future growth
- ▶ Plan for the needs of today and provide for future needs
  - Adequate space for City Staff
  - Improved operational efficiency
  - Improved staff/building security
  - Adequate parking for:
    - Visitors
    - > Staff
    - City Vehicles
  - Flexibility to accommodate future growth

### Georgetown Municipal Complex

- Westside Service Center
- > Parks and Recreation Administration
- > Animal Services
- ► Facility Services
- > Fuel Station
- Possible Need for New Facilities

#### STUDY SCOPE

## SPACE NEED BASED ON ASSUMPTIONS OF 20 YEARS GROWTH

- ➤ Fleet Services has 14,946 square feet and will need to grow to 17,349 square feet.
  - Bay space
  - Work Stations for additional mechanics
- > Parks and Recreation has 13,297 square feet and will need to grow to 15,749 square feet
  - Warehouse space
  - Parks shop space
  - Employee growth
- Animal Services has 4,445 square feet and will need to grow to 8,198 square feet
  - > Additional kennels
  - Dedicated Animal control officer space
  - Get acquainted room

## SPACE NEED BASED ON ASSUMPTIONS OF 20 YEARS GROWTH

- ► Facility Services has 2,765 square feet and will need to grow to 4,405 square feet.
  - Additional Shop and Bay space
  - Outdoor covered storage
- Georgetown Municipal Complex has 52,096 square feet and will need to grow to 63,073 square feet to meet future long-range requirements, if all departments remain in the building.

  - Fuel Station
  - Storage Yard
  - Loading Dock

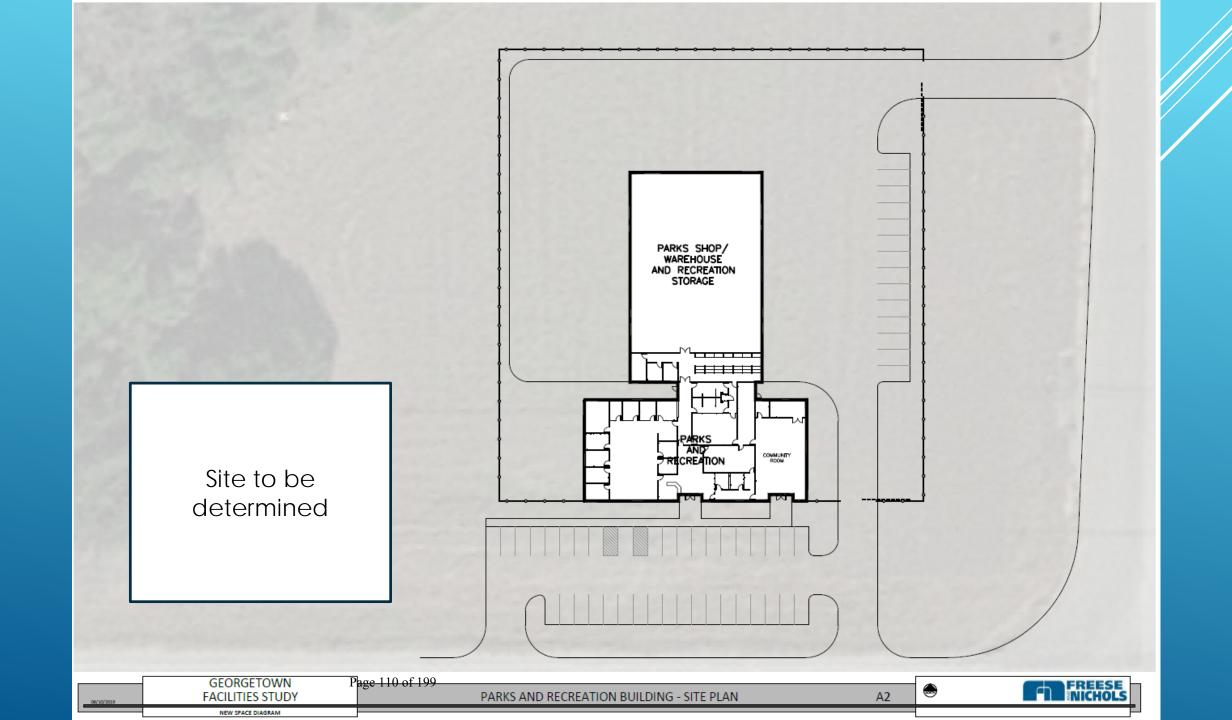

NEW SPACE DIAGRAM

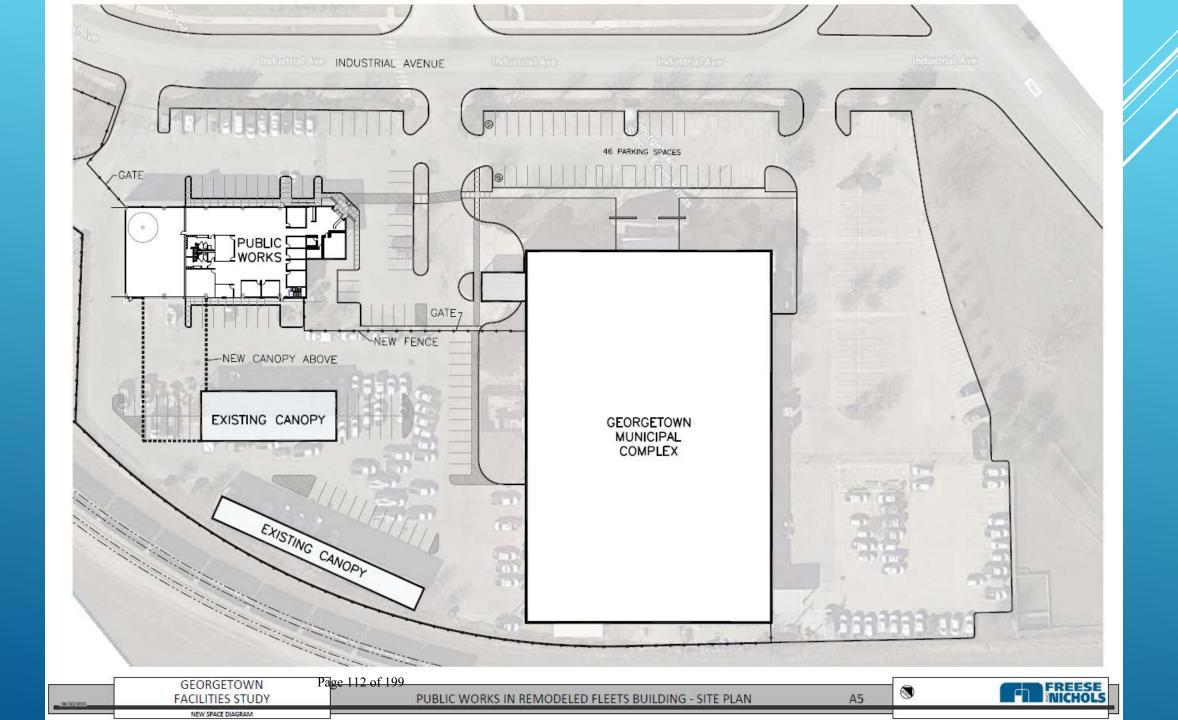

## ANIMAL SERVICES

- \$4,931,284 + 25% = \$6,164,105
- 11,235 SF
  - Renovate Existing Parks and Rec Admin
     5,320 SF
  - Renovate Existing Animal Services Building 1,115 SF
  - New Kennel Space 4,800 SF
- Includes:
  - Additional Kennel Space
  - New Runs between the buildings
  - New/Additional Bark Park
  - Space to meet the needs of the Animal Services Master Plan

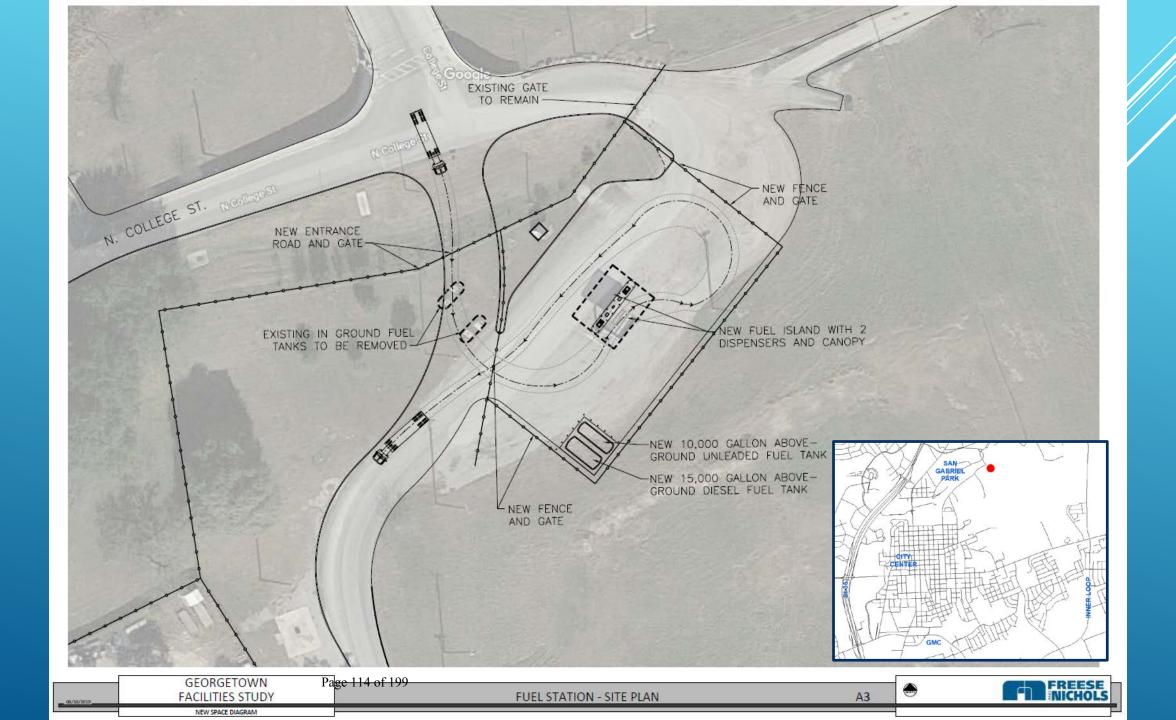

## PARKS AND RECREATION ADMINISTRATION

- \$8,065,176 + 25% = \$10,081,470
- 18,015 SF
  - New building 8,790 SF
  - Shop/Warehouse 9,225 SF
- Includes:
  - New Parking Lot
  - Community Room
  - Storage Yard

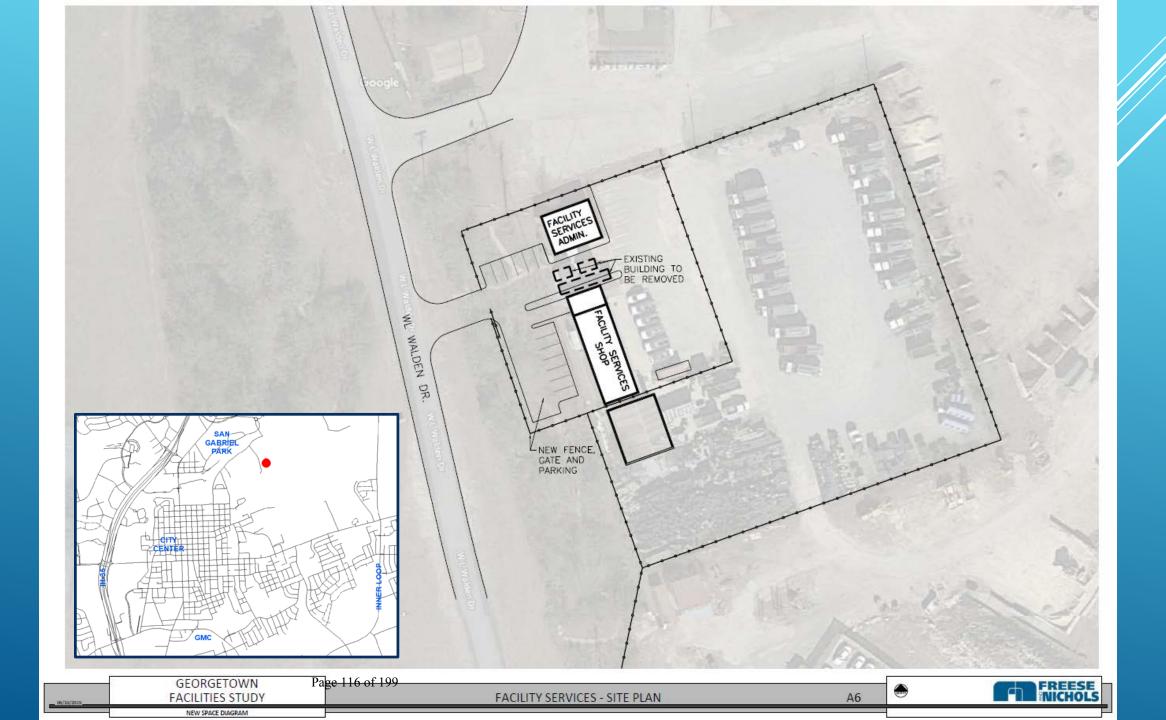

## PUBLIC WORKS

- \$3,358,114 + 25% = \$4,197,642
- 8,745 SF
  - Renovate Existing Fleet Building 7,400 SF
  - New Entry/Lobby Addition 1,345 SF
- Includes:
  - Traffic Management Center
  - 2 drive-through bays
  - Additional parking
  - Large canopy

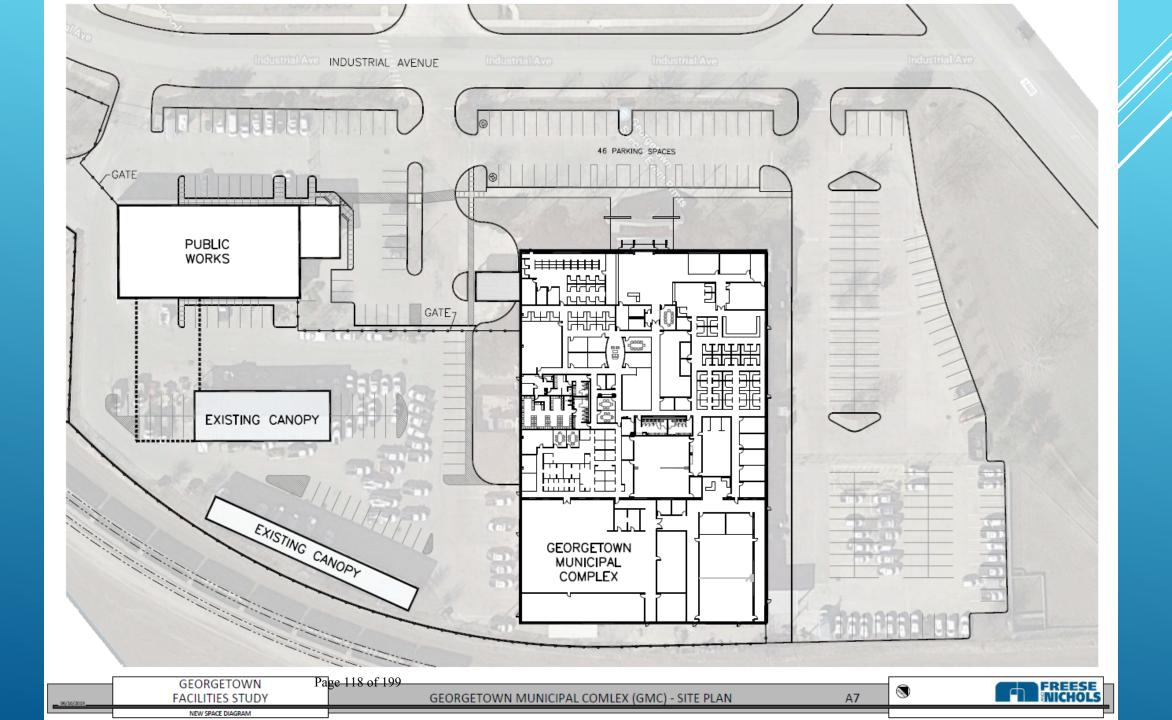

# FUEL STATION

- \$951,937 + 7% = \$1,011,337
- Includes:
  - Security Fence
  - Sight Lighting
  - Above Ground Tanks
  - New Fuel Island and Canopy

## FACILITY SERVICES

- \$761,014 + 20% = \$913,216
- 2,070 SF (of renovation)
  - Renovate Existing Building 1,360 SF
  - Renovate Shop 710 SF
- Includes:
  - Reutilization of existing building for admin space
  - Removal of admin space in the shop for additional storage and work space
  - Entrance from Walden Dr. (This should assist with Transfer Station Design)
  - Parking off Walden Dr.

## GEORGETOWN MUNICIPAL COMPLEX

- $\bullet$  \$6,579,448 + 28% = \$8,421,693
- 27,920 SF
  - Renovate Existing Building 21,160 SF
  - Interior Addition (warehouse) 6,760 SF
- Includes:
  - New Meeting Space (most is public accessible)
  - Secure back of house
  - Receptionist in the lobby
  - Room for expansion

NEW SPACE DIAGRAM

# GEORGETOWN MUNICIPAL COMPLEX SHORT TERM

- \$192,308 + 30% = \$250,000
- Renovate Existing Building
- Includes:
  - New Meeting Space (public accessible)
  - Secure back of house
  - Receptionist in the lobby

## NEXT STEPS

- This current years CIP budget identifies funding for the Short Term GMC renovation
- This current years CIP budget identifies funding for the Fuel Station
- Begin working on the long range strategy for funding the other facilities into the CIP budget in upcoming years.
  - Over the next 5-10 years

Innovative approaches
Practical results
Outstanding service

#### **EXECUTIVE SUMMARY**

Freese and Nichols, Inc. (FNI), rendered professional services to the City of Georgetown, Texas, for a study to address current and future space needs for City departments. In the recent years, the City has added 85 positions, yet the City has completed the construction of only one new facility. The efficient utilization of existing space is paramount to the City's fiscal responsibility and justification of any new facility construction when required as the City's population increases toward 100,000.

This study provided the City with adequate space for the City's existing staff; improved operational efficiency; improved staff security; adequate parking for visitors, staff, and City vehicles; flexibility; and direction to accommodate future growth.

FNI's study consisted of programming, planning, concept development, and preparation of opinions of the probable costs of construction. FNI's scope included the following:

- Evaluation of current facilities' uses and possible efficiencies that can be achieved;
- Development of a plan to achieve current and future needs;
- Involve substantive user and stakeholder input;
- Create concept plans for efficient space usage; and
- Anticipate and prepare for the requirements of future needs.

To improve departmental efficiency and customer service at the GMC, several departments were recommended to relocate to other facilities. This would allow departments with staff in various locations inside the facility to be co-located. Also, the front lobby would be renovated, providing better customer service and additional security for the building.

Public Works department would relocate from the GMC to the renovated and re-purposed existing Fleet Services facility located on the GMC grounds. Also, relocating from the GMC would be Purchasing and Warehouse. Fleet Services, Purchasing, and Warehouse would be accommodated in a new facility constructed north of the GMC across FM 1460.

The Parks and Recreation administrative functions currently in the Parks Administration Building could be relocated to a new facility adjacent to the Georgetown Recreation Center or other appropriate location. Parks shop, warehouse, and recreation storage areas would also be relocated. Relocating these services

#### Georgetown Facilities Efficiency Study

City of Georgetown

would then allow the adjacent Animal Services to expand into the current Parks Administration Building and storage areas.

Facility Services shop area would remain in its current location while expanding its administrative functions into a neighboring existing building. Existing storage sheds would be removed.

A new fuel station with above ground storage tanks would be constructed at the site of the current fuel station and existing below ground fuel tanks would be removed.

The Westside Service Center is a new facility, fully finished, including workstations. The facility has twenty-four unoccupied offices and workstations. The departments occupying the facility currently can expand into the unoccupied areas without requiring additional space in the future.

The Opinion of Probable Construction Cost (OPCC) for these above new and renovated facilities is estimated at \$35,397,713 in 2019 dollars.

#### 1.0 STUDY PROCESS

FNI conducted a project kick-off meeting with City Staff, reviewing the scope of work and schedule. FNI received drawings of the existing facilities listed above. With City Staff, FNI visited each facility to obtain general understanding of the facilities.

Prior to subsequent walk-throughs of the facilities, FNI prepared base floor plans for use in the facilities' assessments and internal organizations. FNI then conducted visual assessments of the facilities, noting current physical conditions.

FNI prepared a six-page survey form which was distributed to the various departments' heads. The form requested departmental information such as function and services provided, interactions with other departments, public interaction, number of current and future employees and whether in offices or cubicles, support spaces, number of vehicles, and required storage. FNI with City Staff conducted a total of fifteen separate one-on-one interviews with the department heads to review and confirm their responses on the surveys.

Using the information obtained in the surveys and confirmed in the interviews, FNI developed a "Facility Space Needs Analysis" for departments in the GMC building and for departments not located in the GMC Building. A similar analysis was developed for number of vehicles for current and future employees. Working with City Staff, these analytical "programs" formed the basis for test fits, where departments could be rearranged or relocated to improve staff efficiencies and customer service. FNI developed conceptual site and floor plans for new and renovated facilities. Upon the City's approval of the plans, FNI developed OPCCs for each project.

#### 2.0 FACILITY SPACE NEEDS ANALYSIS

The Facility Space Needs Analysis provides for the square footage per department located inside of the GMC Building (Exhibit 1). These departments are the following:

- Permits/Inspections
- Customer care
- Deputy GM
- GUS Administration
- Public Works

- Utility Operations- Tech Services
- Utility Operations- Water services
- Utility Operations- System Ops/ Electric Services
- Purchasing
- Warehouse
- Engineering Services
- Shared, or Common, Spaces in the GMC Building are identified also.

For each department, the position or title of the employees, along with their office or cubical size, the number of staff at that position, both currently and in the future are identified. For example, Permits/Inspections currently has fourteen staff occupying 1,573 square feet. The staff is expected to grow to twenty-three occupying 2,312 square feet, or a 47% growth in space needs. GMC has 52,096 square feet and will need to grow to 63,073 square feet to meet future long-range requirements, if all departments remain in the building.

The Facility Space Needs Analysis (Exhibit 2) provides for the square footage per department not located inside of the GMC Building. These departments are the following:

- Fleet Services has 14,946 square feet and will need to grow to 17,349 square feet.
- Parks and Recreation has 13,297 square feet and will need to grow to 15,749 square feet.
- Animal Services has 4,445 square feet and will need to grow to 8,198 square feet.
- Facility Services has 2,765 square feet and will need to grow to 4,405 square feet.

Exhibit 3 is a Parking Needs Analysis with the numbers of parking spaces for current as well as future employees. Current employee parking demand is 258 spaces, and future demand is 374 spaces.

#### 3.0 FACILITIES PLANNING

FNI with City Staff tested opportunities to improve space conditions primarily at the GMC. By relocating departments from the GMC Building to other facilities, the departments remaining in the GMC Building would be better able to expand in the future. The GMC could be re-planned internally to better consolidate departmental staff. Additionally, the front lobby could be improved, increasing customer service while improving overall building security. The departments recommended to be relocated from the GMC were Public Works, Purchasing, and Warehouse. These three departments currently occupied

12,543 net square feet in the building, and, in the future would expand into 16,048 net square feet which could not be accommodated in the building.

In reviewing multiple options, Fleet Services will require additional staff, improved work areas, and additional vehicle storage area for the increased number of vehicles waiting service. Expanding Fleet Services in its current location was not a viable option.

Relocating Fleet Services along with Warehouse and Purchasing from the GMC to a new location was a recommendation. With Fleet Services relocating, the existing Fleet Services facility would be re-purposed for Public Works.

A proposed site for a new Purchasing/ Warehouse/ Fleet Services facility was on vacant land to the north of the GMC, across FM 1460. The site had sufficient area for visitor/ staff parking in front (during bidding and bid openings Purchasing has a large number of visitors), City vehicle queuing area, and Warehouse material lay down area (Drawing A1). The building's proposed internal plan (Drawing A1.1) was developed similar to the Westside Service Center's plan.

Animal Services currently requires additional facilities as well as in the future. The additional growth could be accommodated by utilizing the adjacent Parks Administration building which would require relocation of the Parks and Recreation departments. The proposed site for a new Parks Administration facility could be adjacent to the existing Georgetown Recreation Center by the Williamson County Rodeo Arena (Drawing A2) or other appropriate location. The floor plan (Drawing A2.1) accommodated future staff growth and better connected warehouse and shop personnel with administration.

Planned improvements to N. College Street and its intersection with College Street over the San Gabriel River necessitated rebuilding the City's fuel station (Drawing A3). The existing fuel island would be replaced with new fuel dispensers and canopy. Two existing in ground fuel tanks would be replaced with two new above ground fuel tanks.

In the Animal Services Needs Analysis, better administrative areas along with both indoor and outdoor "get-acquainted" areas were identified. A new site plan (Drawing A4) better connected the former Parks Administration facility to the existing Animal Services facility. The existing Parks Administration building would be re-planned to accommodate current and future Animal Services personnel (Drawing A4.1), and the existing Animal Services facilities would be renovated (Drawing A4.2) with the relocation of administrative staff to the former Parks Administration buildings.

As previously mentioned, with Fleet Services moving out of its current building, the existing building would be renovated to accommodate a relocated Public Works from the GMC. As the Public Works Department works with other departments within the GMC, maintaining a close physical proximity was desirable (Drawing A5). The existing building would be expanded for a new reception area for visitors and a portion of the existing building would be utilized as an indoor storage area for Streets and Drainage (Drawing A5.1).

Facility Services is accessed currently through an adjacent transfer station. A new entrance into Facility Services that avoided the transfer station would be proposed directly from W. L. Walden Drive (Drawing 6). Facility Services administration occupies the same building as the shop area (Drawing A6.1). With the removal of three small sheds, an adjacent building would be reused for the administrative staff. The existing shop building would include a climate controlled storage area and would be expanded for new drive-through covered storage (Drawing 6.2).

With Public Works moving to the current Fleet Services building at the GMC and Warehouse moving off site, employee and visitor parking areas would be expanded greatly, solving an existing parking problem at the GMC (Drawing A7). Existing conditions inside the building indicate staff of various departments located in various locations, not necessarily located in the same or adjacent areas (Drawing A7.1). Once Public Works, Purchasing, and Warehouse vacate the building (Drawing A7.2), consider areas would be open for departments' future expansion and internal reorganizations (Drawing A7.3). The front lobby would be enlarged with a receptionist and improved security where visitors could not access non-public areas. The former Warehouse area would be re-purposed with meeting and conference rooms which could be accessed from the outside for public meetings. City Staff requested a "short term solution" to the front lobby that would provide for an enhanced lobby for customer service while providing additional security to non-public areas (Drawing A7.4).

#### 4.0 OPINIONS OF PROBABLE CONSTRUCTION COST (OPCC)

The total projected construction cost for all facilities' improvements is \$35,397,713 in 2019 costs (Exhibit 4). The OPCCs for the individual facilities in 2019 dollars are as follows:

•	Purchasing/	Warehouse/	Fleet Services (E	xhibit 5)	\$12.713.366
•	r ui ui asii ie <i>i</i>	vvai elibuse/	I ICCL DCI VICES IL	.XIIIDIL J I	212./13.300

• Parks and Recreation (Exhibit 6) \$7,608,657

• Fuel Station (Exhibit 7) \$898,054

#### Georgetown Facilities Efficiency Study

City of Georgetown

•	Animal Services (Exhibit 8)	\$4,524,114
•	Public Works (Exhibit 9)	\$3,080,838
•	Facility Services (Exhibit 10)	\$698,178
•	Municipal Complex Building (Exhibit 11)	\$5,874,507

The "short term" GMC Building build-out (Drawing A7.4) cost is \$187,014 (Exhibit 12).

The costs include fifteen percent for contractor's overhead and profit, five percent for mobilization, and thirty percent for contingency. The OPCC is classified as an AACE Class 5 estimate with an accuracy range of -30 to +50. Costs do not include costs associated with design fees, surveying, administrative costs, real estate, FF&E, etc.

City of Georgetown

#### **PROJECT TOTAL (2019 COSTS)**

35,397,713

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs.

#### NOTES:

- 1 FNI OPCC classified as an AACE Class 5 Estimate (RP-56R-08) with accuracy range or -30 to +50.
- 2 FNI OPCC does not include costs associated with engineering fees, permits, surveying, FF&E, etc.
- 3 Construction cost escalation determined from ENR CCI past 5-year average annual escalation rate of 3.0%. New Purchasing/Warehouse/Fleet Services Building

nnovative approaches ractical results

# City of Georgetown, Texas City Council Workshop December 10, 2019

# SUBJECT:

Presentation and discussion regarding the FY2020 Roll Forward Budget Amendment for capital improvement projects -- Paul Diaz, Budget Manager

# ITEM SUMMARY:

A corresponding action item is on the legislative agenda for the December 10 Council Meeting.

Each year the City brings a roll forward amendment for capital projects or one-time items included and approved in the prior fiscal year. Due to the multi-year timing of capital projects, this remaining budget needs to be moved to the current fiscal year.

Additionally, the Charter and State Law allow the budget to be amended for other municipal purposes that were not foreseen at the time the original budget was adopted. The details of each revenue and expenditure change are presented by fund in Exhibit A and B.

This budget amendment addresses the legal and financial appropriation needed to accommodate these changes. The detailed distribution of the amendment is included in the attachments to the ordinance.

In summary, capital projects, maintenance and equipment replacement are continuing in the following funds: General Capital Projects, Streets Maintenance, Community Development Block Grant, Main Street Façade, Parks, Parkland Dedication, Village Public Improvement District, Police Seizures, Georgetown Transportation Enhancement Corporation, Georgetown Economic Development Corporation, Airport, Stormwater and Water.

The City Charter requires that a majority plus one must approve an amendment to the approved budget. The City charter allows for budget amendments in emergency situations and when the issues and needs were unknown at the time the budget was adopted.

# FINANCIAL IMPACT:

The proposed budget amendment would increase appropriations by \$46,487,128 through a combination of available fund balance and new revenue.

## SUBMITTED BY:

Paul Diaz, Budget Manager

# ATTACHMENTS:

Presentation

Exhibit A

Exhibit B

# CIP Rollforward Amendment

FY 2020

Council Workshop December 10, 2019

# Purpose

- Many large capital projects take multiple years to design, construct or implement
- All funds are appropriate in the first year of the project and any unspent funds are rolled forward into fiscal years until the project is complete
- First reading today, second reading January 14

- Recognize a positive beginning fund balance adjustment of \$25.6 M.
- \$55,688 of additional revenue
- \$25.6 M of capital expenses budgeted but not spent in FY2019

# • Parks:

- Parks projects like neighborhood park development, San Gabriel park improvements, and the trail at Katy Crossing.
- Parks rollforward totals \$1.54 M.

- Facilities and Other Projects:
  - bond funded capital projects like Fire Station 6 and
     7, the EOC Siren System project and the transfer station project.
  - This segment of rollforward totals \$3.1 M.

# Downtown

- downtown related projects like the CVB Redesign funds of \$175,000, as well as funds for Downtown signage and parking upgrades.
- In total, this segment of rollforward equals \$1.8 M.

- Transportation
  - The largest segment of rollforward in this fund is in the transportation segment; \$19.2 M.
  - \$7.6 M for the Northwest Blvd Bridge, \$3.8 M for FM971 improvements, as well as \$2.33 M for Leander Road.
  - Proposed sidewalk rollforward projects include Old Town Northeast
  - Signal and Curb Ramp intersection repair.

# Fund 203 – Streets

- Recognize expenses budgeted but not spent in FY2019 totaling \$358,044
- Appropriate this amount to the expense line so more street maintenance can occur in FY2020 above the original budgeted amount.

# Fund 215 – CDBG

- Staff is proposing to rollforward the funds for the CDBG project at 17th Street. These funds were budgeted in FY2019 but due to timing, the work has not started. Staff is proposing to start that project in FY2020.
- \$182,994

# Fund 226 – Main Street Fund

- Recognize \$51,052 in fund balance
- Rollforward the funds for the main street facade program.

# Fund 228 – Parks Special Revenue Fund

- Recognize a positive beginning fund balance adjustment of \$171,787.
  - \$3,337 of additional revenue and
  - \$168,410 of capital improvement expenses budgeted but not spent.
- Capital improvement projects for South San Gabriel Trail for \$101,066 and the 84 Lumber Park for \$50,000.

# Fund 229 - Parkland

- Recognize a positive beginning fund balance adjustment of \$518,449.
  - \$46,046 of additional revenue and
  - \$472,385 of capital improvement expenses budgeted but not spent in FY2019.
  - In FY2019, parks staff worked to amend the number of Parkland Zones from 19 to 4. As this amendment process was under way, capital improvement was put on hold. Rolling forward the capital improvement projects for park improvements totaling \$472,385 into the FY2020 Budget.

# Fund 234 – Village PID

- Recognize a positive beginning fund balance adjustment of \$767,542.
  - \$9,878 of additional revenue and
  - \$757,665 of expense budgeted but not spent in FY2019.
- Rollforward the capital improvement into FY2020 so these projects can be completed.
  - Madone Park for \$56,750,
  - Parklets for \$279,794,
  - Rowan Park for \$143,141, and
  - Shell road for \$195,227.

# Fund 271 - Police Seizure SRF

- Recognize a positive beginning fund balance adjustment of \$106,752.
- Rollforward this amount for the purchase of police equipment like thermal imagers, body armor and printers.

# Fund 400 - GTEC

- Recognize a positive beginning fund balance adjustment of \$3,555,474.
  - \$104,064 of additional revenue and
  - \$3.4 million of capital expense budgeted but not spent.
- The following projects are proposed to be moved to FY2020:
  - Fontana Northwest Bridge for \$48,657,
  - Interstate 35/ Highway 29 intersection improvements for \$445,825,
  - Mays Street/Rabbit Hill Road for \$4.4 million,
  - and Rivery Extension for \$254,753.

## Fund 420 - GEDCO

- Recognize a positive beginning fund balance adjustment of \$287,190.
  - \$42,578 of additional revenue and
  - \$244,612 of expenses budgeted but not spent in FY2019.
- Rollforward one project totaling \$175,000 for Holt Cat.

# Fund 600 – Airport

- Recognize a positive beginning fund balance adjustment of \$189,040.
- Rollforward the following projects:
  - \$40,823 for runway rehab design,
  - \$150,000 for taxiway edge lighting,
  - and \$25,743 for pavement upgrades.

## Fund 640 - Stormwater

- Recognize a positive beginning fund balance adjustment of \$1.47 million.
- Rollforward the following capital expenses into FY2020:
  - \$425,796 for pond rehab,
  - \$404,652 for curb and gutter repair,
  - \$158,900 for stormwater infrastructure,
  - \$158,824 for the stormwater project at 18th and Hutto,

## Fund 660 – Water

- Recognize a positive beginning fund balance adjustment of \$14.9 million.
- \$4.7 million of additional revenue
- \$10.19 million of expenses budgeted but not spent in FY2019.

## Fund 660 – Water

- Capital expenses totaling \$12.1 million into FY2020.
  - \$3.58 M Park Lift Station and Force Main,
  - \$2.2 M for the Water Line at DB Wood and Pastor,
  - Wastewater improvements at San Gabriel like the belt press and an interceptor.
